**DETAILED ACTION**

1. In view of IUPAC attachment of Appeal Brief filed March 7, 2005, "a block macromolecule" is defined as a macromolecule which is composed of blocks in linear sequence, and "a graft macromolecule" is defined as a macromolecule with one or more species of block connected to the main chain as side chains. Since graft copolymers contain side chains and block copolymers do not, block copolymers and graft copolymers are clearly structurally distinct from each other. Therefore, the rejection of Claims 1-10, 12-15, 16-18 under 35 U.S.C. 102(b) as being anticipated by Klussmann et al. (US 6,143,833) is withdrawn. Further, in view of IUPAC attachment of Appeal Brief filed March 7, 2005, the rejection of Claims 11, 19 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Klussmann et al. (US 6,143,833) is withdrawn.

Further, since Klussmann et al. are silent that the disclosed process can be applied to a block copolymer, it would not be apparent to one of ordinary skill in art to modify the process teaching of Klussmann et al. to obtain the process invention of claims 1-19. Claims 1-19 are allowed.

***Allowances***

2. Claims 1-19 are allowed.

3. The following is an examiner's statement of reasons for allowance:

As of the date of this office action, the examiner has not located or identified any reference that can be used singularly or in combination with another reference including the closest prior art of Klussmann et al. (US 6,143,833) to render the present invention anticipated or obvious to one of ordinary skill in the art.

In light of the above discussion, it is evident as to why the present claims are patentable over the prior art.

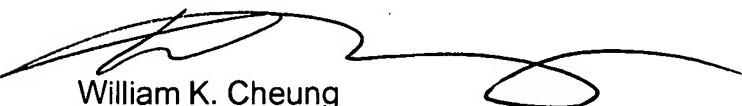

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
